LONDON HOUSE.

Our Spring Stock is now daily coming to hand. We will show all the Novelties in Dress Materials, Prints, Satens, Flannelettes, Jacketings, Millinery, Hats, Feathers, Flowers, Velvets, etc.

Our Millinery Department, under the charge of Miss Wright (late of Mrs. Young's), will be better than ever supplied.

HARRIS & STEWART, LONDON HOUSE.

Charlottetown, April 17, 1891.

HE MADE A MISTAKE!

"I made a mistake," the old man said.
"To spend money on Shoes like those."
And a trickling tear escaped from his eye
As he looked at the holes in the toes.

He will never make such a mistake again, for hereafter we will buy GOFF BROS. Solid Leather Boots. feb20

SPRING MEDICINES

WE HAVE NOW IN STOCK, among many others, the following seasonable Remedies:—Ayer's and Hood's Sarsaparilla, Warner's Safe Cure, Paine's Celery Compound, Campbell's Quinine Wine, Scott's, Putner's and Miller's Emulsion, Fellow's Compound Syrup, Burdock Blood Bitters, Beef, Iron and Wine, Pierce's Discovery and Prescription, Fruit Salt, Maltine (plain and in combination with Cod Liver Oil), Beef, Iron and Wine, Cascara Sagrada, Hypophosphites, etc.

A. S. JOHNSON,

Corner Kent and Prince Streets.

Ch'town, March 28, 1891.

How They Enjoy It.

JOHNSTON'S FLUID BEEF

CONTAINS ALL THE ELEMENTS THAT ARE NEEDED TO FORM "Flesh," "Muscle" and "Bone."
feb18-d&wky

A Reputation of Five and Twenty Years Standing

THE GREAT INVIGORATING TONIC,

CAMPBELL'S QUININE WINE.

INVALUABLE in cases of Loss of Appetite, Weak or Painful Indigestion, Malaise, Lowness of Spirits, Fevers of all kinds, and as a general Strengthening of the system when weakened by changes of the season.

It is necessary to remember that there are many so-called Quinine Wines, but that the GREAT ORIGINAL is "Campbell's," and that the genuine bears our signature upon the label. The best proof of its value is the fact that its sale at the present time is larger than ever before.

The following certificate shows how CAMPBELL'S QUININE WINE is appreciated. Having submitted two samples of Quinine Wine, imitations of the genuine, along with a sample of our own, to the Public Analyst, we received the following reply:

"CAMPBELL'S is the only genuine Quinine Wine of the three samples examined at Messrs Kenneth Campbell & Co's request."
JOHN BAKER EDWARDS, Ph. D., F. C. S., Public Analyst.

The New Register.

THE convention of trotting horse breeders recently held in Chicago organized a new register company to be called the American Trotting Horse Register Association. The trouble between Mr. Wallace and some of the breeders, which has been brewing for some time has been settled by the new organization buying for \$130,000 the stock and plant of the Wallace Register Company, newly all owned by Mr. Wallace. The object of the new Association is "to establish rules, regulating the standard, and to register trotting horses under that standard, and to advance the legitimate interests of the breeders of the trotting horse." The capital is \$150,000 in \$100 shares. No shareholder is allowed to hold more than \$5000 stock. The management shall be vested in a board of 30 directors. The new body assumes ownership and control of all the publications which have been issued by the Wallace Company, including the Year Book and Wallace's Monthly well known to readers of horse literature. It is not yet known who will succeed Mr. Wallace in the responsible position of Registrar. Mr. Wallace is probably too far advanced in years to continue his old work, and probably there is too much friction between him and such breeders as Mr. Brodhead and Colonel McDowell, of Kentucky, to insure harmony. The veteran founder of the valuable records on the trotting horse commenced his labors 35 years ago, when all was chaos and confusion. He is now nearly seventy years of age when he retires from what he calls "his life work." The headquarters of the new association will be located in Chicago instead of New York. It is to be hoped that Mr. Wallace's successors will ever hold in view the rare qualities possessed by him, which made him many enemies but which contributed in an eminent degree to that high position—the foremost place—which the great Republic holds in breeding and developing the trotting horse. By reason of the fact that neither bribe nor flattery was ever able to convince Mr. Wallace that what was fraudulent or unsupported by sufficient evidence, might, without much harm, gain admission to the Register, his path was not strewn with roses.

SHAWMUT.

Great Expectations.

SIR.—It is not quite certain as yet whether the Commissioner of Public Works will be opposed or not. A few wire-pullers, however are busily engaged carrying around a requisition, asking that he be allowed to go in unopposed. Query? If he is so sure of his election, and so strong a card as some of his friends profess him to be, why are they so anxious to obtain the signatures of Liberal-Conservatives to the petition?

At all events the requisitions are still going the rounds, backed up by promises wholesale and retail. For instance, the newly elected Commissioner of Public Works, while he has issued circulars to supervisors throughout the country not to repair roads and bridges, in the mean time is promising great boons in some localities in his own district. He is going to build a new bridge for Souris West. He is now having repaired a bridge at Naufrage, and is going to erect in the same locality about a mile of close-boarded snow or rather sand fence, about fifteen feet high, of haematac, to prevent the shore sand from destroying the farms at that place. He is also going to build a plank road-way, with iron spans, across Souris beach, a distance of nearly a mile.

All we need add, is that if he attempts to carry out even half of what he is promising, it will take a much longer time to do it than he is likely to remain in office.

RED POINT.

School Examination

AT MURRAY HARBOR SOUTH.

The following is the result of the written examinations:

Arithmetic—1st, Enoch Mugford; 2nd, Henry Phillips; 3rd, Leith Cowan, Lester Brehaut.

English—1st, Lester Brehaut; 2nd, Leith Cowan; 3rd, Julia Brehaut.

Geography—1st, Lester Brehaut; 2nd, Enoch Mugford, Henry Phillips; 3rd, Fred. James, Leith Cowan.

Botany—1st, Julia Brehaut, Lester Brehaut; 2nd, Henry Phillips; 3rd, Leith Cowan.

Agriculture—1st, Enoch Mugford, Lester Brehaut; 2nd, Henry Phillips; 3rd, Leith Cowan.

History—1st, Henry Phillips; 2nd, Enoch Mugford; 3rd, Lester Brehaut.

French—1st, Julia Brehaut.

Latin—1st, Alder Brehaut.

Geometry—1st, Alder Brehaut.

Algebra—1st, Alder Brehaut.

French—1st, Alder Brehaut.

*This scholar has already passed the entrance examination to Prince of Wales College, and is now preparing the advanced examination in order to be admitted to study for first-class license.

May 4th, 1891.

Horse Notes.

We visited Mr. P. P. Gillis' stables today and were shown his fine stock. First we were shown the trotting stallion Parnell. Parnell is a beauty; for color, size and finish it is hard to surpass him. Mr. Gillis is pretty sure that Parnell will enter the charmed circle this fall. Next comes Joe Biggar, Parnell's first colt. This three-year-old is about sixteen hands high and weighs 1050 lbs. He is the color of the sire, and reckoned by horsemen to be one of the best gaited colts in the Province. Mr. Gillis informs us that he has sold Joe Biggar to C. H. Trainor for the handsome sum of \$250. Paul says that is the kind of stock to breed. We were next shown a beautiful bay filly, Fanny Parnell, by Parnell. One would imagine she was a thoroughbred, and Paul says that she will make three-year-olds hustle this fall.

Expected every day, a large lot of baby carriages, at Mark Wright & Co's, to be sold off cheap. ap 29 6i

Temperance Teaching in Schools.

(Presbyterian Witness).

A healthy and rapidly extending public opinion favors the introduction into our schools of practical subjects that will at once interest and instruct the young. We have been teaching our children things far away and useless when we ought to have been familiarizing them with things that are near at hand and vitally important. They are expected to know the headlands and bays the rivers and lakes of Europe, Asia and Africa; they can name long lists of states, counties, cities, towns in the United States; when they might perhaps be more profitably learning about their own minds and bodies, the rules of health, the duties and responsibilities of children in an enlightened Christian community. We do not doubt that in many of our schools timely instruction has been given in the laws of health and in the structure of the human body. All we desire is that instruction in this line should be accentuated in proportion to its importance.

Our children ought to have as much instruction in regard to "Temperance" as can wisely be given. They ought to be taught also the necessity of pure air in houses, schools, churches and all buildings. The importance of due supply of pure water for domestic use; the danger of bad draining in houses; the peril of allowing impurities near our dwellings—these and a score of other truths ought to be impressed on the minds of the young.

Then as to conduct: there ought to be some way of impressing upon our sons and daughters the dangers of late hours, inadequate sleep, needless exposure to inclement weather, dancing, or even sitting still, in crowded rooms; long drives or rides in the open air without proper clothing; eating unseasonably, or eating unsound or badly cooked food, drinking liquor of any sort, or even drinking much tea. We need not refer to smoking, or to the pernicious habit formed by so many young persons of smoking cigarettes and other abominations; all admit the folly and danger of this hateful habit.

It is possible to introduce instruction in physiology, hygiene, and temperance into the common schools? We believe it is possible. Some progress has already been made among ourselves, so that we require only to push the matter farther, cautiously, wisely, steadily.

What a—(Story)!

For Neuralgia, a novel cure—which we can hardly believe to be true, will ever become popular—is vouched for, it is said by the New York Sun. An Irish girl in Paterson, N. J., had suffered with Neuralgia of the head and face until almost frantic with pain; actually beating the wall with her head to cause insensibility. Her employer having heard that a Dr. Terc had cured rheumatism by the sting of a wasp, asked the girl if she would try it. With courage born of despair, she exclaimed "Any other torture would be pleasure beside this." A yellow wasp was obtained, and vexed into stinging her face. Within a few moments the pain ceased, the girl fell asleep, and strange to say, never again had an attack of neuralgia. Well, we don't blame her. The remedy was probably too heroic for a second dose. A learned specialist when told this yarn remarked, "The pain may have stopped temporarily, but it could only have been temporary." Continued he, "It is a fact that a sudden shock to inflamed and painful nerves will stop pain," but the remedy is worse than the disease, as many unthinking people in after years find out, who apply fiery and dangerous compounds externally to stop Neuralgia and Rheumatism. They only continue to shock their nervous system, ignorant of the fact that, as in the morphine or alcohol habit their mental and moral nature is thus gradually being destroyed. "Make haste slowly" is the advice to cure any nerve disease" was the advice to a lady by a friend who had been cured of chronic neuralgia by using for some time Johnson's Anodyne Liniment inhaled, taken internally, and applied externally, as advised in the wrapper around every bottle. Neuralgia is a fever or inflammation of the nerves, and only by degrees can any inflammation be cured; and then only by an anodyne treatment. Old Dr. Johnson had this in mind when he devised his Anodyne Liniment; a remedy now known to every one, as it deserves to be. Surely a medicine without real merit could not have survived for eighty years, as this one has done.

Lynch Law Endorsed

BY THE GRAND JURY OF THE CITY OF NEW ORLEANS.

A New Orleans despatch of the 5th of May says: The grand jury in the Hennessy case, and the killing of the Italians in the parish prison reported to-day, says the evidence as presented showing the jury in the Hennessy case was tampered with, that the talesmen were influenced by money and that Detective O'Malley participated in most, if not all, the unlawful acts in connection with the case. The grand jury indicted Thomas McCrystal, John Cooney, K. C. O'Malley, Bernard Glavin, Charles Granger and Ferdinand Armand for attempting to bribe talesmen. The researches of the jury developed the existence of a Mafia composed largely of Italians and Sicilian criminals. It states the uprising which did the lynching was the spontaneous uprising of the masses, making it difficult to fix the guilt on any number of participants, and that the act seemed to involve the entire people of the parish and city of New Orleans, and that a thorough examination failed to justify the grand jury in presenting indictments.

OFF AGAIN.—The schr. Arctic, of Lunenburg from Summerside, P. E. I., for Barbadoes, struck on the ledge north of Port Hawkesbury on Monday, and after remaining five hours, was towed off by the S. S. Rimouski and proceeded to Halifax.

BEARS EXTRAORDINARY.—The Fredericton Gleaser says: It is rumored that H. Braithwaite, the veteran hunter, has this spring killed seventy-five bears, beginning the work with the slaughter of twenty in the same den.

TEN POUNDS

IN TWO WEEKS

THINK OF IT!

As a Flesh Producer there can be no question but that

SCOTT'S EMULSION

Of Pure Cod Liver Oil and Hypophosphites Of Lime and Soda

is without a rival. Many have gained a pound a day by the use of it. It cures

CONSUMPTION, SCROFULA, BRONCHITIS, COUGHS AND COLDS, AND ALL FORMS OF WASTING DISEASES. AS PALATABLE AS MILK.
