Cafeteria Is Suggested For Souris High School

SOURIS — The January meeting of the Souris and Regional Home and School Association was held in the High School Library with a large number in attendance. The president, Ray Malone, opened the meeting with the Home and School prayer. The minutes of the last meeting were adopted as read. After the Treasurer's report, the roll call was taken. The Home and School shield was won by Mr. Solomon's class.

Business began with the voting of a sum of money for group membership in the Prince Edward Island Music Festival Association. Money was also voted for the annual advertisement in the Souris Regional Yearbook.

A letter from the Canadian Home and School and Parent-Teacher Federation, concerning Home and School and Canada's Centennial, was read. This national organization has undertaken a program consisting of two main plans: "to enrich the country by improving the reading habits of Canadian children; and, efforts to improve the educational opportunities of Canadian Indians." More brochures on this project are being requested and it will then be discussed further at the next meeting.

In response to a letter from the Prince Edward Island Federation of Home and School Associations, a family life committee was named. Chairman of family life is Mr. Peter MacAulay; of community life, Mr. Underway; and of school life, Mr. J. O. Gallant.

The president expressed the gratitude of the staff of Souris Regional High for the response to the book drive, organized and carried out by the students of Souris Regional, during the first term of the school year.

VIEW FILMS — The meeting moved to the film room for two educational films on the "growing pains" of adolescents and the resulting headaches to parents. After this short entertainment, business resumed. The possibility of the installation of some type of cafeteria in the High School was discussed. Parents of those students who must bring lunches to school were particularly in favor of this idea.

PEITF Presents Math Telecasts
As a new mathematics program will be introduced in the classrooms of Prince Edward Island schools before long, the Prince Edward Island Teachers' Federation with local television for a series of mathematics telecasts which will be designed to provide instruction to teachers in the new approaches to mathematics, and to help parents understand the new programme.

This series, "Mathematics for Teachers", will be seen every Saturday evening from 5.00 to 5.30 for a number of weeks beginning Jan. 29.

Rv. E.J. Roche of St. Dunstan's University and Harry Love of Prince of Wales College will do the teaching in this television project, and PEITF is busy completing final arrangements in time for the initial programme the last Saturday of this month.

Campbell Says Government Not Aiding Fisheries Enough

SOURIS — Alex Campbell, leader of the P.E.I. Liberal party, told approximately 250 Liberals at a recent meeting here that the present government is not giving the fishermen of this province enough assistance. He named fishing and farming as the big Island industries, saying they should be used to spur employment on P.E.I. He also felt that this province has gone too far with frozen foods plants.

Other speakers at the meeting, held in St. Mary's Parish Hall, were Sydney Green, T. J. Kitchham, Frank Sigsworth, chairman of the party's policy committee; William Acorn MLA and Daniel MacDonald.

Mr. Kitchham told the meeting that it is the responsibility of a political leader to explore and search for possibilities of furthering the economic progress of the people. He felt this would increase incomes and tax potential to increase public services in the field of education, welfare programs, electrical services and public works.

Mr. Sigsworth suggested that the ideas of the liberal party should come from the people who should present a strong front for their leader. He stated that the advice of the aged is also needed.

Mr. Acorn suggested to Mr. Campbell that fishermen be supplied with modern equipment; that an all-weather road be built from Charlottetown to East Point and that a National Park be built in the eastern end of the province.

Daniel MacDonald closed the meeting by relating the story of Mr. Campbell's nomination and winning the post of party leader.

Building, Ship Blazes Occur In Georgetown

GEORGETOWN — A fire was discovered at 8 a.m. yesterday aboard the steel trawler Gulf Grenadier at the railway wharf at Georgetown.

The fire was located in an area between decks which will eventually be used as a fish handling space. It was evidently caused by the overheating of an electric arc welding machine which had not been turned off. The fire broke out in the output lead of the machine. It burned off the lead wire and set fire to adjacent electric cables.

The particular welding machine involved was undamaged but another welding machine nearby was burned out. Also damaged were rubber gaskets, port lights, and dead lights all which were located in that area. A section of the hull in the fire area had the paint blistered on the outside. Smoke and soot

led of the machine. It burned off the lead wire and set fire to adjacent electric cables.

The fire was located in an area between decks which will eventually be used as a fish handling space. It was evidently caused by the overheating of an electric arc welding machine which had not been turned off. The fire broke out in the output lead of the machine. were carried through the engine room, the ships hold, and the entire ship's accommodation area. The fire will not affect the work operations on the ship to an appreciable extent and the overall fire damage is relatively small in comparison to the value of the entire ship.

The Gulf Grenadier is fast nearing the completion stage of fitting out after having been launched Dec. 11, from the Bathurst Marine Ltd. shipyard here. Insurance underwriters for ship's equipment and underwriters for builders risk insurance on the ship have been advised of the fire, the company stated.

OPENINGS INSTRUMENT REPAIRMEN
\$2.86 per hour

ELECTRO-MECHANICAL—Repairing sub assemblies and components for servo-mechanisms used in naval weapon control systems and testing, tuning and alignment of the systems.
ELECTRONIC—Repairing sub assemblies and components of radar and data transmission systems employing pulse techniques and testing, tuning and alignment of weapons systems. In addition to the above, some positions require the ability to repair sub-assemblies and components of acoustic torpedoes.
ELECTRONIC SYSTEMS—To diagnose faults, modify, repair, align and calibrate equipments in one of the following fields: Communications, Radar or Electronic Test Equipments.
NOTE: Applicants who fail trade test for Instrument Repairmen may be offered employment as Electrician at \$2.42-\$2.47 per hour provided they pass Trade Test for this classification. Must have ability to read blueprints and circuit diagrams.

MACHINISTS
\$2.42 - \$2.47 per hour

Manufacturing and repairing all kinds of metal parts within the close tolerances prescribed for machinery, working from blueprints and written specifications. Must be skilled in the use of all machine's hand tools and have the ability to operate all machine tools.

PLATERS
\$2.42 - \$2.47 per hour

Working from blueprints and specifications, to fabricate and assemble various parts of ship's hulls, e.g. shell plates, framing, deck beams, deck houses, guard rails, etc. To prepare and set up materials and parts for welding. To repair metal parts of ships by using inserts, doublers or by renewing parts.

BOILERMAKERS
\$2.48 - \$2.49 per hour

To repair or renew all parts of boilers, e.g. tubes, stays, burner registers, brick pans, superheaters, economizers, fire boxes, tube sheets, spectacle plates and castings. Layout and develop templates for uptakes, stacks, etc.

LOFTSMAN
\$2.64 per hour

To fair the lines of a ship, lay down a scribe board, lay out and develop templates for frames, longitudinals, girders, margin plates, floors, shell plating, deck beams, uptakes, funnels, and many other structural components of ships. Instruct Hull Apprentices in basic loft work.

WELDER ELECTRIC
\$2.42 - \$2.47 per hour

To weld together metal parts by means of arc welding apparatus and welding electrodes; to fabricate metal shapes and to repair broken or cracked metal objects; required to interpret blueprints and sketches and lay out metal in accordance with blueprints before carrying out welding operations.

PIPEFITTERS
\$2.43 - \$2.48 per hour

To undertake the repair or alteration of air, oil, water and low pressure steam piping systems in ships and buildings, making wire templates and pipe assemblies and laying out and installing pipes, pipe fittings and fixtures. Assembling of components with bolts or patent fastenings. Testing of completed assemblies by air or water pressure.

MAINTENANCE MECHANIC (REFRIGERATION)
\$2.42 - \$2.47 per hour

To carry out installation, repairs, calibrations and adjustments on ship-board and shore establishments to waterflow meters, steamflow meters, water level meters, area meters and air flow meters, computing relays and standatrols, feed water selector stations, steam temperature selector stations, p.m. gauges indirect, direct and vacuum, draft gauges, class P. transmitters, nozzle and vane transmitters, temperature transmitters, smoke density recorders, pressure and temperature recorders, control drives; valve positioners, thermo hydraulic generators, Johnson controls and positioners; to carry out trouble shooting and removal of defective equipment from ships to shop for repairs; will form part of train team on all final trials being carried out on Bailey Meter system.

NOTE

1. For all positions applicants must provide proof of at least four years indentured apprenticeship, or five years acceptable experience in the respective trade or outside journeyman status.
2. All positions subject to trade test.
