CARD OF THANKS

MRS. HARRY DAVIDSON and family wish to thank all the neighbors and friends for all their kind deeds and to all that sent cards, flowers, and messages of sympathy.

IN MEMORIAM

WILSON — In loving memory of our mother, Mrs. Mary Wilson, who passed away Nov. 4th, 1962.

This month has come with deep regret
Brings back a date we'll never forget
You fell asleep without good bye
But memories of you will never die.

Sadly missed by her daughter, Mary and sons, Jack, Hiram and Gus and grandchildren.

GALLANT — In loving memory of Peter R. Gallant, who passed away November 4, 1961.

Peacefully sleeping, resting at last,
His weary trials and troubles past;
In silence he suffered, in patience he bore,
Till God called him home to suffer no more.

Inserted by his wife and family.

MARSHALL — In loving memory of our dear little son Don who passed away in 1946 at the early age of six years.

Resting where the shadows fall
In perfect peace he waits us all.
And God will link the broken chain
And one by one we'll meet again.

Ever remembered by his mother and father Horace and Edith Marshall.

Electric Activity In Brain, Intelligence Link Is Found

By BOB MacKENZIE

OTTAWA (CP)—Two University of Ottawa psychologists have found a link between human intelligence and electrical activity of the brain, but they still are not sure what the actual correlation is or why it occurs.

"This will probably take another two years," John Ertl said in an interview here.

The discovery made by Mr. Ertl and Prof. William Barry has aroused interest throughout the world since they first published their findings last spring. Since then they have been to the U.S. for conferences at New York and at Princeton University and to see officials of the U.S. office of education in Washington.

The two men are continuing their work at the university here seeking additional confirmation of their work in measuring the brain's response to a flash of light. They are trying to measure the underlying efficiency of the brain, on which all intelligence depends.

The test measures the brain's responses—changes in electrical activity—to a light flashed 100 times at random during about a five-minute period. A computer records the response after each flash and stores the information to give an accumulated report in the form of an oscilloscope picture showing visually the changes in electric current.

Big advantage of the new technique, said Mr. Ertl, is that no conscious response was required from the person being tested.

He recalled a standard IQ test he took one time when extreme nervousness during the test lowered his score to 77 just above the moron category —although he went on to earn is master's degree.

He said the technique could be used for persons handicapped in some way by standard tests.

The project, directed by Dr. C. F. Rhodes Chalke, chairman of psychiatry in the faculty of medicine is supported by the National Research Foundation and the Ontario Mental Health Foundation.

IN MEMORIAM

HUESTIS — In loving memory of our dear son and brother Ewen G. Huestis who was killed near Whitehorse, Yukon November 4th, 1960.

Five years have passed since that sad day
When one we loved was called away.
God gave us strength to bear it;
Courage to face the blow,
But what it meant to lose you
No one will ever know.
Away in God's beautiful garden,
Sheltered from sorrow and pain.
Some day when life's journey is over
We shall meet our loved one again

Lovingly remembered by Mom, Dad, brothers and sister.

READY TO ERRUPT

KUMAMATO, Japan (AP)—Mount Aso spewed black smoke and ash 2,100 feet into the air Wednesday but there were no casualties reported among 5,000 sightseers lured to the area by the volcano's recent rumblings. Meteorological experts warned, meanwhile, that the volcano, one of Japan's most active, may erupt soon in a large explosion. Rumblings from the 4,340-foot peak caused two light earthquakes earlier today.
