New hope for prevention of Heart Disease

In spite of accurate diagnosis, advanced medical science and surgery, heart disease is still the greatest killer today. What causes it? Can it be prevented? The National Heart Foundation of Canada, recently formed, will intensify the search for the answers to these questions. It will also correlate the excellent work already being done across Canada.

THE LIFE INSURANCE COMPANIES IN CANADA

The first concern of the National Heart Foundation is to step up the tempo of research into the causes of heart disease. The Foundation will encourage the practical application of research by every possible means. It will seek to stimulate professional and lay education and help family doctors to keep abreast of the newest developments in diagnosis and treatment.

Support of the National Heart Foundation is just one of many ways in which the life insurance companies in Canada are helping to create a healthier, happier life for Canadians.

THE LIFE INSURANCE COMPANIES IN CANADA

The Life Insurance Companies in Canada are supporting this Foundation because it is so important to the future health of Canadians. They have made substantial grants to cover the cost of launching the organization.
