Nfld. Trade Discussed At Trade Bd. Meeting

Mr. William Agnew of the Department of Industry and Natural Resources was the guest speaker last evening at the regular monthly meeting of the Summerside Board of Trade held in the Civic Building.

Mr. Agnew chose as his subject the development of trade with the Province of Newfoundland and he also dealt with the possibility of having a boat call at this port on regular scheduled trips throughout the summer to take produce to Newfoundland and bring back products to Prince Edward Island.

Mr. Agnew said that "There is no doubt that Newfoundland has made tremendous strides since confederation and on each of my trips to that Province this has been brought home to me more and more. I would like to say that in my connection with Newfoundland, over the years, I have personally received the fullest cooperation from all government departments and from the people in general."

Apparently there was an idea to investigate Prince of Wales College but why I can't find out. "Through the grapevine I learned that certain people were called up and it is doubtful if a quorum was ever held. On some occasions witnesses were heard. On some occasions witnesses gave testimony under oath and their evidence was taken down. When I took objection to the procedure the hearings were finally opened up to the public and done properly."

"I attended these hearings that were open to the public and I heard evidence where the Principal of Prince of Wales College was asked and questioned about his contract. He told the Government he did not seek the job and that he had been given the contract."

Speaking in reference to the Principal's salary, the Leader of the Opposition stated that the Deputy Minister of Education was receiving more money than Dr. MacKinnon.

"In view of his qualifications he came down here at a very low salary. According to the contract he was asked \$100 a year increase. Would anyone object if he stayed here for 30 years and got as high as \$7,200 for his work? These remarks were made in reference to a clause in the report which advocated the elimination of yearly increases on a regular scale."

"If this recommendation is put into effect we will lose Dr. MacKinnon," stated Mr. Bell. "I am much concerned at this investigation which is aimed at Prince of Wales College. I do not like it when things are said against P.W.C. It has turned out many fine men in the past and will do so in the future. I don't like to see the College discredited or under an investigation which aims to discredit it in the eyes of the public. There was no investigation of School Unit No. 1 where they were behind \$9,000 on their payments."

"We should think that Dr. MacKinnon is one of our own boys. His father was Minister in our Government here for years. We more or less coaxed Dr. MacKinnon to come back and take over P.W.C. If you can get more men of his calibre to come into the Province like he did it is a funny thing to me."

"The suggestion that there was no discipline in Prince of Wales College is ridiculous to my mind and should never have been made in this House. There is a student body of 500 and that body is better behaved during the past four or five years than they were previously. You will find less damage in Prince of Wales College than in any other College in Eastern Canada."

"I went to P.W.C. for four years under Dr. Robertson. I never saw any patrolling of the corridors. The statement that the teachers did not have one but two offices was ridiculous. I agree with the statement of the member who stated that the investigation was a 'damn waste of time'."

Premier Matheson stated that he disagreed with the Leader of the Opposition on the matter of procedure but he did not disagree on the matter of his other remarks.

"This report is very controversial and it would be most unfair to expect those who did not see the report before to speak on it. I would propose an adjournment of the debate to study it and any further discussion on the motion might take place on Tuesday afternoon."

direct. This boat is equipped with refrigeration and it is ready to make calls at Summerside and one other port if asked to do so and this port can offer at least twenty tons of freight. Following Mr. Agnew's talk an open discussion took place on various points which he brought up in his discussion. It was felt that some definite move should be made to make arrangements to have this boat call at Summerside and the general opinion of the meeting was that it could best be handled if some one here would act as a broker and make arrangements to have the necessary tonnage ready when the boat called at Summerside. Mr. William Hayward, the president of the Board presided and paid high tribute to Mr. Agnew for his interesting and informative address. Mr. Hayward referred to the passing of the late Senator J. Walter Jones and recalled that any matters referred to him by this Board had always received a courteous and sympathetic hearing from him while he was Premier of this province. On motion it was decided that the Board will send a letter of condolence to the widow and family of Senator Jones expressive of the sympathy of the membership on their loss. Mr. John Mungall, reporting for the tourist and publicity committee announced that at the next meeting of the Board in May Mr. George Fraser, director of tourist and publicity would be present to address the Board.
