

MOTHER-DAUGHTER FASHION COMBINATION

Shown above are two of the models who participated in a fashion show at Marshfield last night sponsored by the Marshfield Women's Institute.

Mrs. Reginald Gay, wearing a pink Boucle suit of a shaded pink, with bone accessories is shown with her daughter, Melydy Gay who is wearing a pink Boucle shift over a checked party dress. The show was staged at the Women's Institute Hall and will be staged again tonight.

Shaw Dissatisfied At Ottawa Proposals

Premier Walter R. Shaw yesterday expressed keen disappointment with the new federal government tax sharing plan as it relates to this province.

He said it was not fair to Prince Edward Island and did not approximate the financial needs of this province.

Premier Shaw had hoped for far greater recognition of the needs of the province and said that any equalization grants should be based on fiscal needs as the primary consideration.

He said the revised pension plan follows closely the leadership of Quebec and is a far cry from the proposal by the federal government. Premier Shaw anticipates additional changes after the common debate.

The premier went on to say that unless pertinent provisions are made for P.E.I. in relation to the fact it has the highest self employment rate and a about lowest per capita earnings those who most need the pension will be left outside the plan.

The premier indicated he would further study the plan when he has more details.

Lobstermen Prepare Gear Despite Ice

SOURIS — Activity in Souris is rapidly growing as the local fishermen prepare for the opening of the lobster fishing season.

The harbor at Souris is still plugged with ice but there is a large open spot outside the harbor, although the ice floes can still be seen from the shore.

North Lake harbor is reported open but the ice is just outside the harbor mouth.

Boatage is also open with the ice just outside. The first boat to be launched for the 1964 season went in the water yesterday, the owner being Billy Carter of Souris.

There has been no talk as yet of the fishermen asking for an extension of the seasons opening date due to ice conditions.

Cars Collide In Cutting

SOURIS — An accident occurred yesterday one mile north of Elmira when a 1962 vehicle driven by Columbia Raymond Campbell, Elmira, collided in a cutting with a 1953 car driven by Abern James Jarvis, also of Elmira.

The accident occurred about noon but there were no injuries and damage to both vehicles was \$200 each.

The Souris detachment of the RCMP investigated the accident.

RETURNS HOME
Mrs. Edward McCue returned to Alberton on Sunday after spending the past week with her sister who underwent surgery in a Halifax hospital.

Specialist Shortage Blamed On Brain Drain From Canada

By **BRENDA LARGE**
OTTAWA (CP) — The "brain drain" of Canadian university professors to the United States was blamed here for contributing to a shortage of specialized international study courses in Canadian universities.

Dr. J. F. Leddy, a professor at the University of Saskatchewan, told a special meeting of the national conference of Canadian universities and colleges: "There is a crucial shortage of distinguished specialists, particularly in the field of Asian studies, due to the continuing drain of trained academic personnel to the United States."

Dr. Leddy spoke at the two-day conference, sponsored by the Canadian Universities Foundation, which brought together some 175 educationists from 16 Canadian universities.

He told his audience, which included 36 university presidents, "If our scientific laboratories

Specialist Shortage Blamed On Brain Drain From Canada

are no adequate or our humanities and social science libraries, they would be a matter of grave public concern."

Today delegates will present resolutions and recommendations regarding the report.

A new constitution for the national conference of Canadian universities and colleges, and 1961.

WORLD ENERGY
Natural gas provided 15.5 per cent of total world energy in 1961.

Seek ARAA Aid For Dam Project

ABRAMS VILLAGE — An application for a dam to provide a fishing area and therefore a tourist attraction in the Wellington area was made last night under the ARAA program by the Wellington District Resources Development Association.

Under the chairmanship of Eric Poirier the meeting decided that an application should be made to have the dam built on the prometry of Area T. Aresault studied in the hope of establishing a fishing area. The spot was termed ideal for a project.

Assisted by ARDA field representative, Gordon Ripley, the meeting included in the application several reasons why they felt the area was suitable for ARAA assistance.

These included the fact that into this fishery and reduce the amount of sear."

Mr. Wilder reiterated Mr. Brody's statement about the "lobster crop" problem. He said that increasing the number of units you do not increase the catch, but the catch is made much more evenly.

Loran E. Baker, Maritime area fisheries director said that the time has come when the lobster fishermen should realize that the fishing regulations are made for their own good. He went on to say that "the great progress will probably be made by educating the children in coastal communities as to the need for conservation and fair play."

Leigh Williamson, of Conley's Lobsters Ltd., of St. Andrew's N.B. told the meeting of the serious effect the Passamaquoddy power project would have on the lobster industry if the project was carried out.

He pointed out that if the project were carried out, some 1000,000 pounds of lobster spawning space would be lost. Pound operators in that area would have to find a new site.

CLOSED SESSION
A closed session on the "Said Cod Industry" was held also yesterday afternoon and last night, delegates were guests at a dance in the Hotel ballroom, with music provided by Do a Messer and his Islanders.

Today, a business session at 9:30 a.m. and another at 2:30 p.m. precede the civic reception and P.E.I. Government banquet tonight.

The vice of delegates attending the convention will be special guests at a luncheon at the Belvedere Golf and Winter Club. Yesterday the ladies were taken on a tour of the City which included a tour of the Confederation Building, and were guests at a tea at Government House yesterday afternoon, following the tour.

Monties Hopes Are Doomed

OTTAWA (CP) — The bubble appears to be bursting for Ottawa Montagnards and their hopes of a spot in the Allan Cup final.

The Ottawa club was hailed as a giant-killer after knocking off the highly-regarded Windsor Maple Leafs in the eastern semi-finals. But Monties now face the task of winning four straight games against Woodstock Athletics if they are to stay in the running for Canadian senior hockey honors.

The fourth game of the best-of-seven east finals is set for here tonight with Athletics holding a 5-0 edge in games.

The Ottawa camp is puzzled by the sorry showing of the Monties against the Ontario champions. Many of the Ottawa officials believe the Woodstock club doesn't measure up to the Windsor club.

STEEL FEETS HEADLINES

1800 tons go up during stormy winter period for Rothsay's new mill at Saint John.

"ROBB'S" ability to complete their programme in time, and to maintain a high standard of workmanship despite severe winter conditions, was a major factor in enabling us to meet our schedules", says A. H. MacCallum, Project Manager for Robert McAlpine Limited.

November 5th
On the 21st of October ROBB crews moved into the Rothsay site. Seventeen fine days later they completed this 240 ton structure for the storage building. Enclosed at once, it served as a storage center for the contractor and temporary offices for the owner.

Progress by February 6th
Three months later, through a period of stormy weather ROBB not only put up another 1200 tons of steel for the main machine building but also erected a 60 ton crane inside. By the 6th of February when this picture was taken, another 350 tons of steel had been erected for the finishing room.

Inside progress by February 6th
Speedy erection is a feature of steel construction. This paid handsomely for McAlpine who were soon able to put 230 men to work inside the building where reasonable temperatures prevailed.

Robb Engineering in Amherst, N.S. are the largest and most experienced steel fabricators in the Atlantic Provinces. Their performance on this project for Rothsay is typical of what they can do for you.
