Khrushchev Waves Whip Over Red Farm Officials

MOSCOW (AP) — Premier Khrushchev threatened Soviet farm bureaucrats with mass dismissal unless they learn to copy Western methods.

"It would be stupid to ignore the achievements of foreign science only because they were made in a capitalist country," he told his Communist party central committee. "Vladimir Ilyich Lenin did not consider it a shame to learn from the capitalists."

Speaking at a special meeting of the committee and invited agricultural specialists, Khrushchev warned:

"If officials do not want to study and apply the new, or are too unreceptive to the achievements of science and practice and continue to obstinately cling to the old, such people must be replaced and others promoted."

DISSATISFIED

Khrushchev's remarks indicated dissatisfaction with the operation of the farm administration apparatus which he reorganized a year ago to devote special attention to farming.

Khrushchev also accused underlings of distorting his personal campaign to introduce mass sowing of corn in the Soviet Union. He recently acknowledged that in many arid areas wheat is a more suitable crop than corn, but Friday he angrily declared:

"Distortions must not be tolerated . . . the most valuable crops for local conditions should be used."

Khrushchev said farm production would double and treble once the chemical industry starts producing enough fertilizer.

In the speech, as summarized by the Soviet news agency Tass, Khrushchev also:

—Struck out again at the U.S. Central Intelligence Agency's estimates of a decrease in the Soviet economic growth rate. He said the CIA report showed the capitalists were worried about Russia's "temptestuous" economic growth.

—Proposed to give long-delayed pensions to old collective farm workers by setting up a fund that probably would be drawn mostly from farm wages.

—Denied Western reports that he was cutting back heavy industry and defence potential to pay for building up his chemical industry.

—Proposed to set up a new agency to study scientific trends in the West, presumably to prevent Russia's getting left behind the West in developing new industries such as chemicals.

—Denounced Communist Chinese leaders as "those newly-baked Trotskyites" and accused them of trying to break up the Communist movement.
