

...Continued

PHILOSOPHY: Sketch the development of human thought; estimate its significance. Compare with the development of any other kind of thought.

GENERAL KNOWLEDGE: Describe in detail. Be objective and specific.

EXTRA CREDIT: Define the universe; give three examples.

ENGINEERS DICTIONARY

Business Student-self-acclaimed know-it-all, with the wisdom of a retarded snail. Totes 47lbs of books to every calss for a whole year without ever using them. I.Q. comparable to an Artscie

Engineers Blood-Clear, cold, free flowing liquid 98.99% alchohol, sometimes foamy.

Center of Universe-re-volves around Engineering rooms.

Amusement-Cending an Artise who asked directions to the washroom into a mine-field

Disappointment-Artsctie luckily (for him) didn't step on any mines.

Monday, October 25, saw an unexpected guest arrive at Bair Judson's Geology class. The guest, seeming a trifle ruffled upon arrival, was greeted with a bit of surprise. He, however, after showing his view on the controversial subject of creation vs. evolution was ousted from the room by a keen

student who obviously shared the same views as the professor. The class, though, looks forward to many more special guests sometime in the future.

Well, it's the end of another season of softball for the Engineering Squad and as usual the Engineers came out on top. Actually, right from our first win (the first game) we were destined for the World Series of Softball Championship.

The Engineers entered the playoffs in fine form, after strategically building a few teams' confidence by purposely throwing the final 3 regular season games.

The first game was a pushover against a feable Marian Hall team led (Ha! Ha!) by Mark (give me a boust up to the next step) Murphy. The Engineers charitably donated Marian three runs, nice huh? However, the Engineers scored 10! 10-3!! (chuckle, chuckle!!) **LOSERS!!**

The next game demonstrated how the Engineers' superior minds outsmarted the opposition - in this case S.&D's. Following a minor 18-1 setback a week earlier the Engineers downed a cocky over-confident S&D's team 3-2. It seemed that S&D's couldn't penetrate the excellent defense of Us or get to the fine pitching of Steve Mayhew. The catch of th the game came in the bottom of the last inning as Steve (I'm really an Engineer...Honest) MacLear sent a ball into orbit only to have Billy Morrison pick it off somewhere to the right of Saturn saving a sure game tying home run.

The finals saw the Engineers again set up a team, Korakin, only to knock them off. After allowing them a 6-3 headstart, the Engineers came back to score 3 runs in the bottom of the 7th inning sending the game to extra innings.

The Engineers impenetrable defense

shut Korakin down, runless in the eighth. In our half of the inning with two out and runners on second and third, Peter Dumphy (MVP) came to bat. Just to put the pressure on, he ran the count to 3 and 2, 2 out, 2 on in the bottom of an extra inning, score tied whereupon he landed a ball inside the left field line with a little help of some unnamed fielder with astroturf cleats on instead of natural surface cleats. Final score:

ENGINEERS 7- KORAKIN 6. But who ever had any doubts anyway? By the way, Vince, just keep on your diet of 3 bottles of Valium twice daily, - the shock will soon be over.

As a final note: Engineers Spring Training Camp will open in Orlando, Fl. on March 27, '83 immediately following our playing tour of Japan. All interested in trying out contact Whitey Herzog. (left Cards for a real ball team.)

Team Members

- Chuck Victor
- Donnie Hambly
- Chris Taweel
- Billy Morrison
- David MacDonald
- Mark Victor
- Steve Mayhew
- Walter Jaeger
- Joey Killorn
- Peter Dumphy

- Jerry Coady
- Alan Aitken
- Chris Ruston
