Mr. Baker said that the drop in the cost-of-living index for Canada in recent months had been entirely due to the decrease in prices paid to farmers for their goods. This had come at a time when costs of farm labor, machinery and other necessities for production had increased.

He urged the gathering not to be so ready to place the blame for all the ills of Canadian agriculture on Federal Agriculture Minister (Gardiner). Sometimes it was impossible for him to convince the Cabinet that the government should carry out measures which he wanted adopted to help the farmers. The responsibility he inferred, lay with the cabinet as a whole.

P.E.I. Minister Sounds Warning Re Dairy Industry

OTTAWA, Dec. 3—If decreases in income for dairy products in Canada continue, "the economic prosperity of our province will be jeopardized, perhaps doomed," Prince Edward Island's Agriculture Minister C.C. Baker told the Dominion-Provincial Agricultural Conference here yesterday.

The Island, he said, had been blessed with a bumper potato crop and good prices for them this year but without this the agriculture picture for the province would be dark.

"The dairy industry in Prince Edward Island cannot stand any further recessions," he declared. Canadian agriculture was suffering under the disadvantage of having only one export market for its goods—the United States. This had been made evident when the ban on meat shipments to that country had been applied following the outbreak of foot-and-mouth disease.

"It seems to me that some plan must be worked out in the matter of exchange especially with the non-dollar countries," Mr. Baker declared.

He also urged a greater public relations effort to teach the public the importance of agriculture in the national economy.
