### VETERANS COUNCIL DISBANDS

KINGSTON, Ont., April 11 — (CP) — After four years of safeguarding the rights of student veterans of Canada, the National Council of Student Veterans today terminated all business and became a defunct organization. Donald Mathews of Brantford, last year science student at Queen's University here and council treasurer, said there no longer is any need for a national body to represent local councils. The balance of the funds of the National Council, \$200, will be mailed to Ottawa for equal distribution between the benevolent funds of the three services. The National Council represented local student veterans councils in every university across Canada.

### REVEILLE FOR HORSE

BROMLEY, Kent, England — (CP) — Because Alan Humm had no horn in his truck he sounded a bugle. The sound frightened a horse. Humm was fined for terrifying the animal.

By careful planning and saving, this young couple built the house of their dreams with the help of Canada's largest home-lending institution, the Sun Life of Canada. Furthermore, at small additional cost, they wisely protected their investment with a Sun Life Mortgage Protection policy which, should the husband die before the home is paid for, instantly clears all remaining mortgage indebtedness.

## Oil makes a country strong

Try to imagine life without oil! Oil supplies one-quarter of all the heat and power we use... in home and factory, on farm and highway. It helps us live better.  
For years Canadians have had to depend on foreign countries for almost all the oil they used. Now, after a long and costly search, big new fields have been found in Alberta. The more oil we produce right here in Canada the stronger we will be. Already the new discoveries have made thousands of new jobs. Millions of U.S. dollars once needed for imported oil are now being saved by the new oil fields, and the prairie consumers are saving money too.  
In order that Canadians may reap further benefits, Alberta oil must reach new markets. It must be moved to eastern Canada—2,000 miles away—where it must compete with oil from other areas. That means holding transport costs down to a minimum.  
To bring Alberta oil east a tube of steel will span one-third of the continent—from Edmonton to Lake Superior. It is taking shape now. To carry the oil on to Ontario refineries, the largest inland tankers ever built are being constructed in Canadian yards.  
There's a big job still to be done before the full benefits of the new oil discoveries reach all Canadians. But the job is being carried on with increasing benefit to all of us. Oil is strengthening the nation.

### Bringing you oil is a big job ... and a costly one

**About Canada's Oil**—Last year Canadians used an average of 300 gallons of oil each. This is more, per capita, than any nation except the United States.  
By replacing imports, Canadian oil production is expected to save 100 million scarce U.S. dollars in 1950; next year, \$145 millions.  
Imperial is building a new refinery at Winnipeg at a cost of \$10 millions to process Alberta Oil.  
The 1,150-mile pipe line from Edmonton to Lake Superior is being built by Interprovincial Pipe Line Co., which was sponsored by Imperial and in which Imperial holds a minority interest.
