A HORRIBLE STORY. Since the time when the American Mariner told the terrible tale of the cursed-laden ship with her crew of ghastly corpses, no more thrilling story of the sea has been related than that of the "Satanstoe."

PATENT MEDICINES.

HOW FORTUNES HAVE BEEN MADE.

The profit of a patent medicine is illustrated by some statements made in a recent report upon the manufacturing resources of Buffalo. It first mentions the success of Mr. Loveland, the inventor of the "Cathartic."

Dr. J. A. Jayne died in Philadelphia a few days ago, leaving \$3,000,000. He commenced his career in 1810, as a druggist, and soon became famous in putting up a kind of what he called "family medicine," such as catarrh pills, ear medicine, balm, ointment, expectorant, and a score of other curative preparations.

It may be thirty-five years ago that Dr. Benjamin Franklin made his debut in New York. A crowd of people gathered at the time that he presented his receipt for an old man, that either came with him in the ship from England, or that he became acquainted with him in New York.

We are convinced, however, that in the smallest detail, it made to appear in the worst light. This is only what might be expected; but, unfortunately, it decides nothing. Now has the endless historical abstract, which is a diversion to the American Foreign Secretary, always the merit of accuracy to recommend it.

TERRIBLE RAVAGES OF THE CHOLERA.

The following is an extract from a letter written by the American Consul at Messina, dated Aug. 21:

"I write to-day in the midst of cholera, and believe that fifty thousand persons here in the city by emigration than usual. All business houses are closed; not a shop or store is open, except a few apothecaries and provision shops, kept open by the authorities. I have not seen such a panic in the sixteen years of my residence here, although we have passed the terrible epidemic of 1845, resulting in 100,000 burials. In my street few houses are inhabited. The French, the English, and the Russian Consuls, with myself and three or four other families, are the only ones remaining.

WAR PREPARATIONS IN RUSSIA.

Writing on the 25th ult., the St. Petersburg correspondent of the Pall Mall Gazette says:—"The Swedish squadron which came to Cronstadt the other day was received very cordially, and the formal compliments paid to the officer by the Russian authorities contrasted strongly with the cordial and affectionate manner in which the Russian officers under Admiral Farragut, and the American officers were invited to dinner and fetes every day, and the Grand Duke Constantine gave a magnificent banquet in their honor, in his palace at Pawlowski. The splendor of the reception gives some color to the rumors, which is very prevalent here, that an alliance exists between the two nations, and that the United States, in view of certain contingencies which it is supposed may lead to war, however this may be, it is certain that large quantities of arms have been purchased in the United States by the Russian Government, and that all the military arsenals are hard at work. It is expected that war will be originated by an insurrection in the Caucasus in Turkey. The most open sympathy is expressed both here and at Moscow. Committees have been formed with the avowed purpose of assisting the Slavonian subjects of the Porte to liberate themselves from its rule, and large sums have already been subscribed in aid of the Bulgarian insurrection."
