FAMOUS DWARF
 Charles Stratton, widely known as General Tom Thumb, who died in England in 1883, was two feet, seven inches high.

SLIGHT CHANGE
 Maxville, a village near Cornwall in eastern Ontario, was first known as "Macsville" because of the Scots settlers.

NEW DELHI (AP) - India and Red China have withdrawn their troops from the disputed three-mile-high Himalayan area on the remote Indian-Tibetan frontier, an Indian government spokesman said Wednesday.

He gave no further details, but it is understood the Chinese pulled back their forces when Indian army units moved into position within shouting distance of the Reds. Apparently the Indians then withdrew immediately.

The spokesman described the incident as "minor" and said it occurred six weeks ago after the Chinese crossed the Hoti river, which India considers its northern border.

Wave Of Optimism Sends New York Stock Prices Up

By RADER WINGET
NEW YORK (AP)—A sweeping wave of confidence and optimism last week sent the stock market up strongly to a new recovery high.
 There was more bullish enthusiasm in Wall Street than at any time since the market was sent sprawling in a giant reaction last September on news of President Eisenhower's heart attack.
 Measured by the Associated Press average of 60 stocks, the market has retraced nearly 77 per cent of the ground lost in the plunge that started Sept. 26 and hit bottom Oct. 11. Last week the average raced ahead for the greatest gain in the last year.
 So prevailing was the new feeling of confidence that brokers talked about a "quick test of the highs." By that they meant that the market had a good chance of advancing enough to break through to another record high eclipsing even the peak reached just before the president's illness.
 Forecasts of continued good business came from all sides. There was talk in Wall Street of tax reductions next year as though they were in the bag. Profits continued high, dividends never were better, and corporations continued to split their stocks and watch them race higher as a result.
SEE CONFIDENCE
 From the long-term point of view, there were three developments that spelled confidence in both the stock market and the U.S. economy.
 Among Canadian issues on the New York exchange, Dome Mines gained 1/4 over the week's trading and closed Friday at 14 1/4. International Nickel was up 1/2 to 79. McIntyre gained 1 1/2 to 75 1/2. Canadian Pacific was ahead 1/2 to 32 1/2. Hiram Walker lost 1 1/2 to 69 1/2. Distillers Segrams was off 1 1/2 to 40.
 On the American exchange, Lake Shore Mines was off 1/4 to 4 1/4. Giant Yellowknife advanced 1 1/2 to 6 1/2. and Royalite Oil was up 1/4 to 13 1/2.
 Forecasts of continued good business came from all sides. There was talk in Wall Street of tax reductions next year as though they were in the bag. Profits continued high, dividends never were better, and corporations continued to split their stocks and watch them race higher as a result.

Private Firms To Take Over Nuclear Power
MONTREAL (CP) - Private industry in Canada is expected to take over major nuclear power developments in the near future, says J. L. Gray, a vice-president of Atomic Energy of Canada Ltd.
 In address to the air force veterans association, Mr. Gray said several Canadian firms are already taking part in nuclear power development by helping to build Canada's fourth and largest reactor at Chalk River, Ont.
 "We fully expect that Canadian industry will follow in and qualify to design, develop, construct and market nuclear reactors to meet the ever-increasing power demands of this country."

Comments On Newsprint Price
MONTREAL (CP) - The Pulp and Paper magazine says the cushion between production cost and selling price of newsprint "has diminished to less than a safe minimum."
 Commenting on newspaper criticism of price increases, the magazine, described as an organ devoted to the paper and allied industries of Canada, says in its current issue:
 "A fundamental rule of business is that there must be a cushion between production cost and selling price on each unit manufactured, whether it be a motor car, a ton of newsprint, or a thousand newspapers. That margin in newsprint has diminished to less than a safe minimum and is still decreasing. Mills are running at capacity and it is well known that operating any machine beyond normal speed increases the cost per unit."
 The magazine lists labor costs, raw material costs and forest fires as among reasons for the price increase, ranging from \$3 to \$5.

Propaganda Worse Than Commercials
OTTAWA (CP) - Fisheries Minister Sinclair said Thursday there are no commercials on Russian television but their place is taken by propaganda.
 "A record is being set which is worse, commercials or propaganda," Mr. Sinclair said. "Probably the commercials."
ACCUSES REGIME
ANGUSVILLE, Man. (CP) - Manitoba CCF leader Lloyd Stinson says the province's Liberal-Progressive Conservative government has shown "lack of vision, delayed action, and cold-blooded indifference to hardship and suffering" in dealing with Manitoba flooding. He told a party meeting here that the government has given no leadership on flood control, beginning with the 1950 Red river flood.
ULSTER SETTLEMENT
 Londonderry near Truro in Nova Scotia was settled by colonists from Ulster in 1761.

WHERE NARCOTICS WAS CACHED ON SHIP
When RCMP pried loose this section of a ceiling in a cabin of the French freighter St. Malo they discovered the biggest haul of heroin ever seized in North America, worth in the hands of peddler some \$10,000,000. CP Photo.

Scores Extortionate Rates On Small Loans
ESTEVAN, Sask. (CP) - CCF Leader Coldwell said Friday night that "extortionate rates of interest" charged by small loans companies is one of the worst injustices in Canada.
 He told a public meeting here that his party will continue efforts to get legislation through Parliament to slash the interest rates charged by finance companies which run up to 24 per cent and beyond. A CCF bill to do this last session had been rejected by the government.
 The CCF leader said the irony of it is that those with high financial standing have little trouble getting loans from the banks at five or six per cent a year. But those in the lower-income brackets were forced to go to the finance companies and pay 24 per cent when they needed money.
 The statements were included in excerpts from the text of an address issued to the press before delivery.
 The Small Loans Act of 1939 empowered finance companies to charge two per cent per month for the first 16-month period of a loan and one per cent thereafter. On loans over \$500 there was nothing to stop these companies from charging "whatever the traffic will bear."

Found Guilty In Axe-Slaying
TRIOIS-RIVIERES, (CP) - Ovide Boucher was found guilty Saturday of the axe-slaying of an elderly cooper in 1951 and sentenced to be hanged next Feb. 3 in Montreal's Bordeaux Jail.
 It is the third time Boucher has been convicted for the murder of Georges Joubert-Jarjour at St. Henri de Louis, Que. Defence counsel Raymond Maher said he will appeal the verdict.
 "Your crime was atrocious. Ovide Boucher, you will be taken to the common jail of the district of Quebec until Feb. 3, 1956, and from there to the usual execution place, there to be hanged by the neck until dead."
 It marked the end of a five-day trial, the third for Boucher since he was first arrested for the crime early in 1951.

Airman Buys Meat
MONTREAL (CP) - New Zealand mutton is being imported to Montreal, New York and Chicago by a Montreal airman, it was learned Saturday. FO Denis Milton of the RCAF won permission from the Quebec government to import the venison after zoologists and biologists backed up his claim that New Zealand deer are of a different species than North American deer.

Canadian Interest In Boats Brings Upturn In Business
OTTAWA (CP) - Canadians are taking to the water not like ducks but in boats, the bigger and faster the better.
 Canada's 225 boat builders expect this new marine interest of Canadians to bring in 1956 their best sales year yet. So great has become the demand for boats, especially motorboats, that builders are applying the same techniques to production as the automobile industry up to 1953, latest year for which figures are available, show the growing demand. In 1946, the value was \$4,906,359. In 1953, it had almost doubled to \$8,463,531.
 The industry in 1953 employed 1,508 persons, their salaries and wages reaching \$3,545,079. Materials used in actual construction of the boats that year cost \$3,248,688.
 There also is evidence that U.S. boat buyers are showing more interest in the Canadian output. In 1953, they bought \$1,295,628 worth of Canada's boats. This figure rose to \$1,626,806 last year and had already reached \$1,150,096 by the end of July this year.

Found Guilty In Axe-Slaying
TRIOIS-RIVIERES, (CP) - Ovide Boucher was found guilty Saturday of the axe-slaying of an elderly cooper in 1951 and sentenced to be hanged next Feb. 3 in Montreal's Bordeaux Jail.
 It is the third time Boucher has been convicted for the murder of Georges Joubert-Jarjour at St. Henri de Louis, Que. Defence counsel Raymond Maher said he will appeal the verdict.
 "Your crime was atrocious. Ovide Boucher, you will be taken to the common jail of the district of Quebec until Feb. 3, 1956, and from there to the usual execution place, there to be hanged by the neck until dead."
 It marked the end of a five-day trial, the third for Boucher since he was first arrested for the crime early in 1951.

Engineers' Classes
 Lectures in engineering were introduced into the arts faculty of McGill university as early as 1856.

INCREASE PREDICTED IN STEEL PRICES IN THE U.S.
CLEVELAND (AP) - Steel prices may be as much as \$12 a ton higher by next July, but the rise won't come in one big swoop, Steel Magazine says.
 The metalworking weekly said the upward revision of prices may start this year and continue through the first half of 1956, reaching the climax when steel wage settlements have to be paid for beginning next July.
 "Economic pressures have built up to a point where steel producers have no choice but to raise prices," the magazine says. "Wages cost more. Plant construction is more costly. Stockholders are crying for more return on their money."
 To back up this statement, the trade weekly says the cost of labor has jumped 206 per cent and plant construction costs have gone up 178 per cent during the last 15 years, while steel prices have been increased 126 per cent.

Historic Light
First lighthouse on Long Point island in Lake Erie was built about 1830.

Steel Demand
 Steel demand which has kept the mills working at or near capacity levels for the last three weeks is building up even more particularly for steel plates, the magazine says. It explains that the jump in demand resulted from big orders for railroad freight cars, pipelines and army tanks.
 Production of steel for ingots and castings rose one point last week to 99 per cent of rated capacity. Steel's price composite for finished steel was unchanged at \$128.14 a net ton. That for steel making scrap was \$45.33 a gross ton, up 16 cents.

Private Firms To Take Over Nuclear Power

MONTREAL (CP) - Private industry in Canada is expected to take over major nuclear power developments in the near future, says J. L. Gray, a vice-president of Atomic Energy of Canada Ltd.
 In address to the air force veterans association, Mr. Gray said several Canadian firms are already taking part in nuclear power development by helping to build Canada's fourth and largest reactor at Chalk River, Ont.
