

THE DAILY EXAMINER.

JANUARY 18, 1893.

Notes and Comments.

The Halifax Herald reports that word comes from Washington that President Harrison's campaign against Canadian railways has been brought to an abrupt standstill, by the discovery by his attorney general that only congress can cancel the bonding privileges. So Benjamin can only "recommend."

Referring incidentally to the question of unrestricted reciprocity, the New York Sun asks whether this term means that Canada would adopt the American tariff against Great Britain, and it says that "this is the only meaning which would cause it to be entertained for a moment by the Government of the United States."

The Stipendiary Magistrate of Halifax has decided that subscribers to the Home Knowledge and Supply Association "must pay." This is in accord with the opinion expressed by THE EXAMINER. If the operations of the "agent" had not been cut short by the intervention of Messrs. Carter Brothers and the subsequent exposures of the press, the "society" would have taken a pretty penny out of this community.

The cold weather, with which Canada has for a fortnight past, been favored, has had its counterpart in every country of Europe. It is attributed to the same cause as the excessive heat of last summer. Dr. Bachan, an American meteorologist thus explains it. The sun's rays falling upon the southern hemisphere are more than usually powerful, and this has led to the transference of a larger mass of air from the south of the equator to the north. Hence our cold spell.

The Educational Review states that of late several accidents have occurred to teachers while conducting chemical experiments in their schools. In experimenting with dangerous or explosive matters, the greatest care is necessary to insure safety. The example of Faraday—to practise each experiment before performing it in the presence of the class—is the only way to ensure success. There need be no danger in conducting any of the experiments required in our common school course in chemistry. Successful experimenting is of the highest importance in teaching chemistry, and skill and facility in manipulation can only be attained by careful practice.

A Pictou lady, who has been a very successful teacher in the United States for several years, on being asked her impressions of their schools, replied thus: "What do I think is the difference between the common school educational systems of the United States and Canada? I do not consider myself qualified to speak of the comparative values of the systems of the two countries, but judging by my knowledge of the educational systems of several of the provinces and the States, I should say that the education given by the States is more practical than that given by the provinces. In general, what the American child knows, he knows he knows, and the Canadian child knows, he often does not know whether he knows or not."

The St. John Sun states that the Boston papers do not enter with enthusiasm into the crusade which their New York contemporaries are making against the Canadian Pacific Railway. New York journals appear to agree that the Canadian Pacific influence is all that keeps Canada from annexation, and that a blow at the railway would bring Canada into the union. Boston opinion is that the New York attack on the Canadian Pacific is commercial rather than national in its origin. Boston and New York are rivals for the handling of the export trade of Minnesota and other north-western states. The Canadian Pacific and the Grand Trunk with their connecting lines are cheap carriers from these states to Boston. If the route through Canada from the western states to New England were barred, the traffic would go south of the lakes, or by the lake route, and be delivered at New York. The Canadian and Boston route is the shortest and the cheapest. Boston has built the largest elevators in America on purpose for this business and does not want to lose it.

The value of buttermilk is not so much appreciated as it deserves to be. As a beverage it is of so much worth that it has gained a distinct place in "materia medica," and is largely prescribed by the best physicians in cases of indigestion, and in most forms of kidney troubles. An exclusive buttermilk diet has seemed to bring about a cure in many cases of Bright's disease. A proper and constant use of it will greatly reduce, and sometimes cure, the craving for alcoholic liquors, with which persons are afflicted. So that it may be well for the apostles of total abstinence to make use of this beverage to assist those who have been addicted to the use of liquor. Have it neat at hand, and when the craving is felt for liquor, drink half a tumbler of buttermilk. The craving may be satisfied, and the system will be benefited and strengthened instead of weakened. There are many other good effects from the free use of buttermilk. It alone will often remedy acidity of the stomach. The lactic acid needed in many cases is supplied by it, much more than by any other drink or food. It is said to alleviate the oppression about the heart that so many old people suffer from. It is also to a certain extent a stimulant for the entire system, just what the aged need.

ODDFELLOWS GATHERING.—The newly installed Noble Grand of St. Lawrence Lodge, Mr. Fred. H. Sellar, entertained the officers of the Lodge, in all about twenty-five, at his residence last evening. A sumptuous supper was spread, followed by a literary and social programme, the company being well pleased with the reception, separated about midnight. The present promises to be one of the most prosperous terms in the history of the order here.

Back-Ache.

Back ache is caused by sick kidneys. Dodd's Kidney Pills will remove it. By their peculiar action on the kidneys they impart activity and benefit the system by purifying the blood. You cannot have pure blood with disordered kidneys; health's existence depends upon their natural condition; they are the governors of the system; continual disorder results in kidney consumption, which is Bright's disease. Send one to your friends—A few numbers of the Christmas number of the Dominion Illustrated at half price at the Diamond Bookstore.

Out in the Gulf.

AN ICE BOAT WITH ITS CREW AND A PASSENGER OUT SINCE MONDAY MORNING.

A telegram was received from Cape Traverse this morning to the following effect: George Irving left here on Monday morning in the storm for Cape Tormentine, with one passenger and two of a crew, besides himself. Up to this morning nothing has been heard of the boat or crew. When they left here it was blowing hard from the northeast and very thick. The passenger's name is Baker and he belongs to North Bedouque. He was on his way to Colorado for the benefit of his health. The crew's names are Geo. Irving, Mallins Saow, and Chas. Carruthers. It is feared by many that owing to the cold weather, and the boat being small and heavily laden, the men became exhausted and have perished. On the other hand some persons think that they have landed some distance from telegraph or telephone communication, and have, in consequence, not been able to make their situation known.

LATER.

The missing crew and the passenger which left Cape Traverse on Monday morning, as above stated, were brought to town to-day by Mr. John McRae, of Canoe Cove. They landed at that place last evening, between seven and eight o'clock, after being out over seven days. All the members of the party, we are glad to say, have not suffered any hurt from their exposure, and considering the severity of the weather, they are most fortunate. They were brought, together with the ice-boat, by Mr. McRae to the Railway station, whence they will probably leave for home tomorrow morning.

The Strickland-Brennan Case.

The witnesses yesterday afternoon were H. Otto Poole, Dr. Stewart, George Hibbert, A. J. Macdonald, George F. Owen and A. B. Warburton. This forenoon Mr. J. D. Sessman was first called. Mr. Brennan occupied the stand the greater part of the time and detailed the circumstances which led up to the alleged libellous article. He said he did not mean to imply by the use of the word "King Faker" that Dr. Strickland was a cheat or swindler. His object was to purge the turf of P. E. Island of fakery. Cross-examined by Mr. Davies, who produced a file of the Agriculturist, the witness admitted there were instances in which the use of the term "faker" meant a fraud or swindler, and contended that the context governed the meaning to be attached to the word.

Programme of Penny Readings

AT ST. PETER'S SCHOOLROOM, WEDNESDAY, 18TH JANUARY. Reading.....Mr. F. W. L. Moore Song.....Rev. T. H. Hunt Violin Solo.....Mr. Vinnicombe Reading.....Rev. James Simpson Song.....Miss Moore Reading.....Mr. F. H. Arnaud Piano Solo.....Mr. Fred Morris Song.....Rev. Fred E. J. Lloyd Reading.....Mrs. F. Longworth Song.....Miss Palmer Reading.....Miss G. Davies Violin Solo.....Mr. Vinnicombe God Save the Queen.

Doors open at 7.30. Commence at 8 o'clock.

Meeting at Mount Stewart.

A well attended meeting was held at Mount Stewart on Monday evening, the 16th inst., to take into further consideration the advisability of establishing a cheese factory in that vicinity. Cyrus Shaw, Esq., President of the New Perth Dairy Company was present by request, and addressed the meeting in a carefully considered speech of about one hour's length. Afterwards he answered a number of enquiries respecting the different classes of food required for the production of milk; the best mode of handling milk; and various other matters connected with dairying. After the discussion a committee was appointed to obtain additional subscription to the stock list already signed, and the number of cows promised.

Personal.

Rev. James Carruthers, of New Glasgow, N. S., is visiting the city. His many friends here are pleased to see him. Rev. W. B. Hinson, of Moncton, has accepted a call to the Oliver Street Baptist Church, Montreal, at a salary of \$3000 a year. The arduous labor which Mr. Gladstone, at the age of eighty-three, has recently bestowed on the draft of the Home Rule bill, has called public attention anew to the extraordinary vitality, magnificent achievements and remarkable personal history of the great statesman of the British Empire. Mr. Gladstone has been enjoying the health giving air of Southern France in the hope of accumulating sufficient physical strength to bring him unimpaired through the coming session of parliament, which will be the most important since the Act of Union between Great Britain and Ireland was accomplished.

Local Notices.

The Delineator for February, a choice number, is at the Diamond Bookstore. Another big stock—of those choice prize 5-cent stationery packets at the Diamond Bookstore. Look—For the balance of January we will give the lowest prices on all novels at the Diamond Bookstore. The largest stock on P. E. Island.

We do not know of any preparation that has caught the public favor in so short a time as Dodd's Kidney Pills, but when we consider that three-fourths of the Canadian people are afflicted with kidney trouble in some form or other, and that Dodd's Pills are a quick and permanent cure for all these troubles, the large and increasing demand can scarcely be wondered at. Sold by all dealers, or by mail on receipt of price, 50 cents per box. Dr. L. A. Smith & Co., Toronto.

TELEGRAPHIC NEWS.

SPECIAL DESPATCHES TO THE EXAMINER.

THE KHEDIVÉ

Taken in Hand by the British Government.

LONDON, Jan. 18.

A hurriedly convened cabinet council discussed the action of the Khedive of Egypt in changing the ministry without obtaining the consent of the British Government. The British representative at Cairo has declined to recognize the new ministry. The Khedive refuses to make any changes in the ministry. It has been decided that the Khedive must be firmly dealt with. This is taken to mean that the new Egyptian cabinet must be dismissed and replaced by men favorable to Great Britain. It is charged that the new ministers owe their appointment to their hostility to Great Britain. The Khedive in selecting them was influenced by Russia and France. The Cairo correspondent says that Mr. Cromer this afternoon had an audience with the Khedive and presented an ultimatum demanding the dismissal of the new ministry within 24 hours. The Khedive convened a council and presided in person. At the Khedive's request Fakhri Pasha resigned.

SIR JOHN'S MEMOIRS.

His Irish Rule Scheme.

OTTAWA, Jan. 18.

The forthcoming memoirs of Sir John Macdonald, which Joseph Fope is preparing, will contain details of Sir John's Irish Rule scheme, prepared at the request, it is said, of high authorities in England. It was written from Washington in the form of a letter to Lord Lisgar.

DETECTIVE CARROLL

Captures Warren Walker.

MONTRÉAL, Jan. 18.

Constable Carroll of Pictou, N. S., arrived here last evening from Malone, N. Y., with Warren Walker, who forged checks amounting to \$1300 on the Nova Scotia Bank branch at Moncton. By a clever trick he got his man to cross the line and then arrested him, thereby saving the Bank \$500 for extradition. He leaves this afternoon for home.

Calumet Club, of Chicago, Burned.

CHICAGO, Jan. 18.

The Calumet club house was burned here last night. Loss, \$300,000.

Ex-President Hayes Dead.

FREEMONT, Ohio, Jan. 18.

Ex president Hayes died last night.

General Telegraphic News.

QUEBEC, Jan. 16.—This morning Justice Cassault refused the petition of J. A. Dionne asking a recount in L'Islet election on the ground of certain particulars. Tarte will therefore be declared elected by the returning officer. FORT WILLIAM, Ont., Jan. 16.—Members of the Conservative Association celebrated their second annual dinner Saturday night. "The Premier is the right man in the right place" was the unanimous opinion of the large number present. ROME, Jan. 16.—The pope created fourteen cardinals at the consistory to-day, the list not including any Americans. Archbishop Vaughan, Westminster, is elevated to the cardinalate; also Archbishop Logue, primate of Ireland. In all six Italian, two French, two Prussian, one English, one Irish, one Hungarian and one Spanish. The pope announced in addition that the creation of two Cardinals was reserved.

LONDON, January 16.—The weather throughout Europe is intensely cold. In Russia it is 69 below zero. Wood fires are kept burning in the streets of St. Petersburg for the benefit of wayfarers. All river and canal traffic in Germany is interrupted. Navigation on the Baltic is almost closed. In Constantinople tram cars and cabs have stopped running.

BALTIMORE, Jan. 26.—The weather is unusually severe throughout the State. KNOXVILLE, Tenn., Jan. 16.—Not for 30 years has there been such cold weather as now prevails in this section. A dozen or more people are reported frozen to death. Business of all kinds is suspended and the united efforts of city officials and churches are being utilized to aid the poor. This is intense suffering among the mountaineers.

LONDON, Jan. 16.—Hon. Thomas Daly's accession to the head of the department of the interior is resulting in a vigorous emigration policy being waged in Great Britain. A feature of this new policy is the granting of increased commission payments to those steamship agents who encourage bookings to Winnipeg and the Northwest instead of Australia. Vigorous efforts are also being made to increase the emigration from Norway to Sweden and Canada. However, in those countries, owing to more or less opposition to the loss of inhabitants, the agents have to go about their work quietly. The agents in Great Britain are doing good work.

BOSTON, Jan. 16.—There is apparently excellent authority for saying that a big lumber combine has been established by Maine and Massachusetts parties, which will practically control the entire lumber business of the United States. Charles Van Holman, of Boston, and John Ross and Cornelius Murphy, of Bangor, are reported to be promoters of the trust. The syndicate is said to have secured 39,000 acres of lumber land in Maine, 25,000 acres in Florida, 30,000 acres in Kentucky, and over 200,000 acres in New Mexico. It proposes to put up mills in Maine, Massachusetts, Kentucky, Illinois and New Mexico, and to sell direct to builders. The Maine members of the trust have just returned from Kentucky, where they purchased the land mentioned above and they have now gone to Bangor, where they will begin at once to build mills.

WHITE GOODS!

Sale Will Continue Till February.

WORKED EMBROIDERY,

Direct from the Maker in Switzerland. Beautiful Patterns.
