—Mrs. William B. Proffitt, accompanied by her daughter, Mrs. Robert McCullough arrived Tuesday from San Mateo, California, to visit her sister, Mrs. Mary Dougan, and her brother, Mr. Mont McLeod, Alberton.

—"RIDE THE MAN DOWN" AT THE CAPITOL THEATRE SUMMERSIDE

Based on the popular novel by Luke Short, "Ride the Man Down," Republic's spectacular story of a bitter range war of the 1890s, arrived in the Capitol Theatre today in a blaze of roaring action and magnificent Trucolor.

A rugged and picturesque cast dominates this exciting production with the top star roster headed by Brian Donlevy, Rod Cameron, Ella Raines, Forest Tucker, Barbara Britton, and Chill Wills. In stand-out featured roles are J. Carroll Nash, Jim Davis and Taylor Holmes.

The fast-moving story which was serialized in the Saturday Evening Post, concerns a relentless scramble for rich cattle grazing lands precipitated by the death of a wealthy land baron who has bequeathed the fabulous Hatchet Ranch property from a green sea of wilderness.

A prolonged and bitter fight develops between the Hatchet Ranch foreman, portrayed by Cameron, who has carried out his owner's orders with vigilant dispatch, and Ride Mariner, Brian Donlevy, and his henchmen who move in on the territory when Cameron's owner dies.

A powerful romantic theme is carried throughout by Ella Raines, strong-minded daughter of the deceased rancher and her fiance Forrest Tucker, on one side, and Cameron and his fiancee, Barbara Britton, on the other.

YOU CAN DEPEND ON DODD'S KIDNEY PILLS

—RAYMOND GRANT, O.D., optometrist, will be in his O'Leary office each Saturday. For appointments contact Pate & Co.

—MALPEQUE United Church. There will be service in Malpeque United Church on Sunday, April 25th at 11 a.m. Rev. Alexander MacKay, minister.

—PROMOTED TO PO — Leading Seaman Wendell Reeves of the R. C. N., son of Mr. and Mrs. Frederick Reeves of North Bedeque, who is now stationed at the Air Base at Summerside, has received a promotion to the rank of Petty Officer. Petty Officer Reeves is with the Navy Avenger Squadron which is presently in Bermuda for six weeks.—S.

—INQUEST HELD — A coroner's jury empaneled by Dr. W. A. Shea to inquire into the death of Mr. Charles Dennis of O'Leary brought in their verdict as follows: That the said Charles Fraser Dennis came to his death at O'Leary April 9th, 1954, by a 22 rifle bullet causing a brain contusion, administered by his own hand. Evidence of other witnesses was heard. Members of the jury were: Messrs. Ira Ellis, foreman; Dan Roy Macdonald, George Gallant, Daniel Buchanan, and Guy Harris. The inquest was conducted last evening in the O'Leary hall.

—A meeting of the local Association of Girl Guides was held last evening at the home of the district commissioner, Mrs. T. L. Linkletter.

A financial report was given by the treasurer, Mrs. Gordon Ramsay, regarding camp and association funds. Plans were discussed and arrangements completed for raising day which is to be held in May. This project is carried out by the local association for funds in support of provincial guiding.

The prospect of the Girl Guide county camp to be held at Fernwood this summer, and matters of a commandant, other staff members, registrations, and transportation were discussed.

Sealy jerseys made by guides of two Summerside and Siemon Park Guide companies, in competition for the annually awarded Bessborough Shield, were displayed.

The request for the forming of new Guide companies and Brownie packs, due to the expansion of the movement in this district, was presented by guides. Along with this request was the reminder of the necessity for securing additional guides to continue to provide adequate leadership for the growing number of girls who wish to take part in the guiding movement.—S.

Fine Co-operative

rural schools in the Province this year in line with the Department's policy of repeating every three years. They will continue through this month, May, June and July.

Miss Wilson told the teachers that the 'fourth shot', to be given pupils in the fall, would not be given in each of the schools. Instead, she stated, regional clinics would be held in approximately 80 schools to take in the schools in contiguous areas as well.

In telling the gathering, which was very large for the last day of the convention, of the progress made in cutting down the tuberculosis death rate and the practical elimination of deaths from diphtheria and whooping cough she stated her opinion that the program in effect here provided perhaps better protection for the children than in any other Province in Canada.

She noted that parents were inclined to be a bit careless in the matter of re-inoculating doses and said young children should have them every three years. She expressed the hope that parents would assist in the work by taking their children to the family doctor for the various shots but if they did not do this then she said the Department would.

Smallpox Vaccination

The matter of vaccination against smallpox was causing some concern, Miss Wilson said. Parents were becoming careless in the matter and not having the pre-school children inoculated. She stated that this could no longer be permitted and the Departments of Education and Health were urged to take a more severe attitude and insist on vaccination. She asked each of the teachers to personally check all pupils in the class for vaccination marks and report to the district nurse.

In this respect the Director of Nursing paid high tribute to the teachers for their prompt and active aid and their sincere co-operation in all health matters presented before them.

During the public forum session some teachers expressed concern over the possible changes in Grade 8 examinations and Mr. Jolley re-

ported that the natural food supply will be sufficient.

Two English black-tall does owned by Mr. Ira Banks of Poplar Grove, near Conway, are seen above in the building in which they have been comfortably housed since their arrival on Prince Edward Island a few weeks ago.

Mr. Banks received the deer as a gift from his brother-in-law, Rev. Lloyd Henderson, the Mayor of Portage La Prairie, One, and possibly both of these beautiful does are expected to bear young shortly and will then be allowed access to an outdoor enclosure. Eventually they will be given complete freedom to go where they choose. Very graceful, and alert, they are capable of moving with surprising swiftness.

They were obtained from a 17-acre enclosure on an island park near Portage La Prairie. The deer population in the enclosure is maintained at a constant number so that the natural food supply will be sufficient.

These deer, above, are said to be of a different breed than those which had previously been released in this province.

Mr. Banks, who has always been actively interested in fish and game life in this province expressed the hope that no one would be so unkind as to shoot or injure these lovely little creatures when they are released.

REPORT QUEBEC FIRM CONSIDERING BRANCH FACTORY IN SUMMERSIDE

A Quebec leather manufacturer of high-class leather sandals, and bougain suppresses has indicated an interest in the possibility of establishing a branch factory in Summerside, and is expected to visit here the latter part of the month to conduct an on-the-spot survey to determine whether or not it would be practical with regard to local labor, available location, taxes, etc.

His interest in the possibility of locating at Summerside is the result of his acquaintance with the management of the Summerside shoe store of Sheen & McInnis, who have found the products of this manufacturer to be a top favorite of customers, both in quality and satisfaction.

While the whole matter is merely one of correspondence up to the present time, no decision either way can be made until his visit to Summerside. However, if the manufacturer should decide to establish a branch plant at Summerside it is understood that local labor will be employed.

It appears that either skilled operators would be brought here to instruct and train local employees, or that they would be taken to Quebec and receive training in the factory there.

If the plant is established at Summerside it is believed that manufacturing would first be confined to very elemental types of footwear until the operators acquire some degree of skill. Then would follow better and more complicated types of shoes until the factory would be operating as a counter part of his Quebec operations.

On his visit to Summerside it is believed the manufacturer will look over potential locations for his proposed factory which would be contained in some existing building in Summerside.

In addition to investigating the labor potential, which might call for the employment of from five to twenty-five workers, he may also meet with representatives of the government, the town of Summerside, and the local Board of Trade.

Western Powers

The western ministers devoted much of Thursday's meeting to discussing the British, American and French formulas for settling the Indo-Chinese conflict.

Informants said the United States urged that the French grant complete independence to the Indo-Chinese; continue fighting until a mass Viet-Namese army can be raised, trained and equipped with American help; and launch a big counter-offensive within 12 months.

British Proposals

London sources said Eden brought this proposal to his colleagues' attention: An early cease-fire agreement as the first stage of a general political settlement with the Vietminh; follow a cease-fire with the partition of Viet Nam, where Ho's armies control huge chunks of territory, including the rice-rich Red River delta; an allied agreement guaranteeing the new Viet Namese frontiers against any possible Red aggression.

French Premier Laniel, meanwhile, is reported to have come up with his own formula for a negotiated armistice. This includes the disarming or withdrawal of rebel forces in Laos and Cambodia; the division of Viet Nam in clearly defined Vietminh and French union sectors.

Truro Entry Wins Photographic Contest

OTTAWA, (CP)—A country-wide photographic contest sponsored by the Victorian Order of Nurses has been won by Ronald Mosher of Truro, N. S.

Second prize went to Miss Dickie Sada of Hamilton, Ont., and third was taken by Bob Brooks, Yarmouth, N. S.

Subject matter of photographs was the work of the VON. Mr. Mosher's winning entry of "The VON nurse in all weather" showed Miss Frances Cook, nurse-in-charge at Truro, making her rounds.

clies of fish disappearing from most populated areas throughout the province, he said. But there were indications of an increase in the lower St. Lawrence river and Lake St. John areas.
