## KING'S EVIL

Was the name formerly given to Scrofula because of a superstition that it could be cured by a king's touch. The world is wiser now, and knows that

## SCROFULA

can only be cured by a thorough purification of the blood. If this is neglected, the disease perpetuates its taint through generation after generation. Among its earlier symptomatic developments are Eczema, Cutaneous Eruptions, Favus, Boils, Carbuncles, Erysipelas, Purulent Ulcers, Nervous and Physical Collapse, etc. If allowed to continue, Rheumatism, Scrofulous Catarrh, Kidney and Liver Diseases, Tubercular Consumption, and various other dangerous or fatal maladies, are produced by it.

## Ayer's Sarsaparilla

Is the only powerful and always reliable blood-purifying medicine. It is so effective an alterative that it eradicates from the system Hereditary Scrofula, and the kindred poisons of contagious diseases and mercury. At the same time it enriches and vitalizes the blood, restoring healthful action to the vital organs and rejuvenating the entire system. This great

## Absolute Cure

For all diseases caused by the vitiation of the blood. It is concentrated to the highest practicable degree, far beyond any other preparation for which like effects are claimed, and is therefore the cheapest, as well as the best blood purifying medicine, in the world.

## The Annual Shooting of No. 5 Co

THE annual shooting of No. 5 Co., 82nd Bn., took place at Hunter River on Thursday, 1st inst. Notwithstanding a breeze that prevailed, the shooting was in general good. McDonald, on the grounds, rendered the occasion quite entertaining. At noon the company was entertained at dinner by their Captain.

The programme of the day ended with a sham fight, in which considerable military tactics were shown by the officers and men.

## Sending Coal to Newcastle.

NOVA SCOTIA WILL YET SUPPLY ENGLAND WITH COAL AND OTHER MINERALS.

Hon. A. A. Adee, of New York state, third assistant secretary of the United States, who has spent a few weeks in Cape Breton, leaves by steamer for New York. He was asked by a Halifax Herald reporter his opinion about the probability of a reciprocity treaty being negotiated between the United States and Canada, but declined to give expression to his views. He said: "I came down here to seek rest and recreation and have found it. I have been most careful not to say anything on politics during my visit to the province, and cannot now break a good resolution. Besides, reciprocity is too big a question to discuss in a short interview. But I may say that I have been delighted with my visit among that charming class of people—the old Scotch settlers of Cape Breton. No, I am not a Scotchman myself, but my family came over from Scotland two hundred years ago, and I was home myself on a pleasure trip last year. The scenery of Cape Breton is almost, if not quite equal to that of Scotland; and the whole island is teeming with mineral wealth. Cape Breton is undoubtedly one of the richest mineral countries in the world; and it has remarkable advantages of location—between the two great markets of the world. Why, sir, the time is coming and is not far off when you will be sending your coals to Newcastle. England's coal supply is only estimated to last her another sixty years. Where will she get a supply from then? Why, from Nova Scotia. And while her present coal supply is being rapidly exhausted, the cost of mining is steadily increasing. So that Nova Scotia has a really great future before it—a fact apparently not fully appreciated by your people. While in Cape Breton, I was very much struck by the progress your farmers are making in stock raising, and the superior quality of some of your stock. In some places they appeared to take more care of their stock than of themselves.

## An English Writer on Canada's Future

The Westminster Review, which, as every one knows, is one of the very ablest of the higher class magazines of London, is publishing a series of articles on the colonial empire of Great Britain, and has recently dealt with Canada. In speaking of the ignorance, amongst Englishmen, of the colonies, the Review mentions the circumstance, and of course, the average Englishman's ignorance of it,—that Sydney, Melbourne and Montreal are among the twenty most populous cities in the Empire, and that Toronto and Adelaide are found in the next fifteen. The
