Steel Plants In U.S. Busy

CLEVELAND (AP) - Some steel plants in the United States that normally close for the summer with larger vacations and remain open to meet demands for products, steel says. "There are no soft spots in the market," Steel says. "All products are in good demand. Tubular goods and merchant wire products, depressed for months, are starting to pick up seasonally. So is tin plate." Strongest demand is for wide and heavy plates. Steel says, "Production and sales in the major segments, such as automobiles and household equipment—are setting records. And buying plans of consumers indicate that the pace will be maintained." The magazine says production and shipments will undoubtedly decline in the third quarter, but they are not expected to dip as much as usual.

N.Y. Stocks Slip Sharply During Week

NEW YORK (AP)—A "lind" stock market slipped to its sharpest loss of 1964 last week. Trading was dull. "Not a single day provided volume of 5,000,000 shares, which has been about average this year." On Wednesday, an advisory service wired clients to be "alert for a downside break-through on Thursday." That is exactly what happened—a sharp burst of selling Thursday of no particular news. For nearly 10 weeks the market had confined itself to a range with a low point of 810.77 set by the Dow Jones industrial average April 30. Thursday, at prices edged lazily down past this "support" level, traders unloosed before the day ended. In OTC trading, prices plunged 9.31 points to 62.48 in the steep loss since Nov. 22, the day President Kennedy was assassinated. The average fell 21.16 that day. On Friday, however, there was a fairly vigorous rebound which brought the Dow back to 806.0. The loss for the week was 14.53.

AFRICAN POPULATION

The UN estimates that Africa's population is growing at two per cent a year, with a birth rate of 47 and a death rate of 25 per 1,000.

Fishing Boat Skippers Get Exemption
OTTAWA (CP) - The Senate transport committee has exempted hundreds of small fishing boat captains and mates from a government proposal that they be required to hold special certificates under the Canada Shipping Act. The proposal was that masters and mates of fishing vessels larger than 25 tons hold certificates, which would be good for life and entitle them to take command of larger ships. After Dec. 1, 1965, all such masters and mates would have to carry certificates. Senator J. J. Kinley (L-Nova Scotia) objected that the certificates now held by masters and mates of larger vessels would lose their value with a flood of new certificates. The committee amended the government bill so that certificates would be required only on masters and mates of fishing vessels of 100 tons or more. The committee approved changes in the Shipping Act which will permit the federal government, on the request of a provincial government or some other public authority, to restrict regattas and motor boat operations on inland waters where nearby residents object. Approval also was given to limiting to Canadian vessels cargo traffic between Canadian ports on the Great Lakes and the St. Lawrence River as far east as Anticosti Island, in the mouth of the St. Lawrence.
