Hello There!

Procrastination is the thief of time. An old saying, but only too true. Don't we all plan to do things—expect to do things—and then decide that tomorrow will do just as well as today? We waste time and gain nothing. If we put off tidying up the clothes closet, maybe results wouldn't be terribly serious. Could be worse, though, if we postponed checking up the old car.

But let me tell you, one of the biggest tragedies I know can be caused by a fellow putting off a sound life insurance plan. Even one day's delay can mean all the difference between what you're so proud of, and the youngsters who run out to meet you as you walk up the front path at the end of the day.

Yes, to procrastinate is to steal from yourself—to steal contentment. It is stealing from your family—stealing security. I'd sure like to talk about these things with you, and tell you how my great company—the Sun Life of Canada—can take care of your needs.

Canadian Garden Service

By Gordon Lindsay Smith

THE LAWN—In any garden layout the lawn is perhaps the most important feature yet it is often the most neglected. For some reason or other a lot of people seem to think that grass will take care of itself. It will to some extent, if one is satisfied with something about as coarse and tough as fence wire. But fine, all-season green and uniform turf, requires some planning and regular maintenance. Without a good piece of lawn as foreground for shrubbery, vines, flower gardens, paths and buildings, no garden layout, no matter how costly, will be a real success. And it is not really difficult or expensive to create a really good lawn. Here are the major points to keep in mind:

It is much easier to get the ground level and the top soil fine before the lawn is seeded than afterwards, and level and fine it should be for best results in the usual location. On hillsides, slopes should be made as gradual as possible and instead of one long sharp one, two or three levels with terraces, rock gardens or shrubbery and steps in between are advisable. Use the best seed. Except for very special purposes like putting or bowling greens, the best seed consists of mixtures of several fine grasses. Some of these come quickly, some do best late in the season, some have richer color and so on. These are blended together to produce uniformity of texture and color throughout the season and for various regions of Canada. Seeding should be done early, before the hot weather, or after it in the fall.

Lawns should be fed, like any other plant. One good application of fertilizer, rich in nitrogen, is advisable every year or so.

FIRST PLANTINGS—Even in the cooler parts of the country the first actual plantings are usually carried out in March or earlier. This is the seeding of those things that are usually started in greenhouses, hotbeds and window sills. Tomatoes, cabbages, petunias, and so on are in this group. Many people do better with this first seeding at all, but simply buy the started plants in April or May and set out. Of the first seeds planted directly outside will be the very hardy group of flowers and vegetables, which a bit of frost will not hurt. In this group are sweet peas, cosmos, the first carrots and beets, lettuce, spinach, radish and grass seed.

Then there is the semi-hardy group, which includes the most flowers and the hardier vegetables. A touch of frost will not ruin them, though they would prefer to do without.

In the last group are the really tender things that won't stand a single degree below 32. In this category are dahlias, anas, gladiolus, tomatoes, peppers, melons, cucumbers and so on.

CHIPPSTEAD, England (CP)—John Pudney, 44-year-old author and poet, has "caves to let." Dug 25 to 40 feet deep in sandstone quarries in this Kent district about 100 years ago, the caves were equipped with water and electricity as air-raid shelters in the last war.

Co-op Services Open In Fitzroy Street Location

Island Co-operative Services Limited in their new location at 58 Fitzroy Street, formerly occupied by The Swift Canadian Company, is rapidly assuming a businesslike attitude and outlook in keeping with the energetic management and staff which heads up the various departments.

The set-up is a group of three buildings, conveniently connected with ample truck loading space from any department. Considerable space on the second floor of the west building is given over to general offices for Mr. Jerome O'Brien, manager of the services and his assistant, Mr. Leo P. McIsaac, adequate arrangements are also in evidence here for meeting the public as well as the necessary quarters for the accountant, Mr. John Connolly, Miss Lola Heckbert, Stenographer and other staff members.

Two insurance representatives reporting direct to the Manager are Messrs. W. J. Driscoll and J. J. McIsaac, who are full time operatives dealing with co-operative insurance, life, fire, car and casualty insurance.

Equipment Display

On the ground floor of this building, the equipment display has ample room for thorough inspection. Coolers, milkers, refrigerators, washing machines and plumbers supplies are here in profusion and variety, with paints and varnishes of proven value. The plumbing is in charge of Mr. Keith Carmichael. Mr. D. L. MacInnis, Office Manager, has his quarters directly behind the floor display

area and in direct contact with the public on this floor. The Grocery stock-room is also located in this building from which shipments are distributed to more than 20 co-operative store branches on the Island. Fertilizers, insecticides and seeds make up the bulk of the balance of farm necessities stored here for prompt shipment when and where required.

Mr. Leonard MacDonald brings to the Egg, Poultry and Chick Division, located in the east block, the experience of many years in handling such farm products, notably five years with the Swift Canadian Company. Facilities here allow for killing and handling 2,000 birds per day, ready for shipment. More than 50 cases of eggs can be graded in the Egg Grading Station in the quarters provided here where eggs graded by other stations can be received in unlimited quantities.

For the past two months the Maritime market for eggs has been most satisfactory as has also the demand for live chick shipments to points on the mainland, according to information received from the Management. Miss Margaret Hennessy is Secretary in this department.

No Truth U. S. Aiding Chinese Troops In Burma

WASHINGTON, (AP)—The United States Army spokesman says there is "absolutely no truth" to any suggestion that the U. S. is furnishing munitions and weapons to Chinese Nationalist troops in North Burma.

Reports from Burma Saturday quoted Burmese officers as saying that Nationalist remnants were using American equipment in forays against Burmese villages and that munitions and equipment recently had been supplied the Chinese by air drops.

The spokesman said Monday "no American agency of any kind, government or military, is dropping or has dropped" equipment to these Chinese forces which fled to Northern Burma when the Chinese Communists overran the mainland.

He said, however, that the Nationalists in Northern Burma "unquestionably" still retain an extensive amount of American equipment supplied them when they were fighting in the Second World War against the Japanese.

OXFORD, England, (CP)—A famous Christ Church bell, "Great Tom" will be restored in time for the Coronation. The bell, formerly tolled each night with a number of strokes corresponding to the total of original students, but has been silent for years.

Kinsmen Flood Fund Reaches \$24,000

With 98 Kinsmen Clubs across Canada and 24 Kinette Clubs contributing to date, the National Kinsmen European Flood Relief Fund stands today at \$24,028.18. It was reported last night by National President A. Walthen Gaudet of this City.

In addition Kinsmen and Kinette Clubs have contributed to date \$17,774.15 to the Canadian National European Flood Relief Fund direct where official receipts for income tax purposes were necessary.

The Kinsmen Fund is being distributed in England, Holland and Belgium by the Association of Round Tables, a young Men's Service Organization, with which Kinsmen are associated in the World Council of Young Men's Service Clubs.

That makes a total of \$41,082.33 to date raised by Kinsmen for flood relief in the disaster areas of these countries.

Dorothy Dix's Column—

Continued from page 2

love with a man 10 years my senior. He is a widower with three children, and though I know he loves me, I wonder if we could be happy. I have always had all the material things I needed, but married to him, I know I will have to forfeit many of them.

MARY F.

ANSWER: Your chances of happy marriage are entirely in your hands, and depend upon your own capacity of adjustment. Since you have doubts about so many things, I would say the possibility of successful marriage is slim. In order to be a good stepmother to three small children, you'd need complete devotion to the youngsters, the patience of a saint, a nature free from jealousy, and a willingness to make many sacrifices. It's a tall order, but don't consider marriage unless you have the qualifications for such a union.

Miss Nissen cannot reply personally to readers but will answer problems of general interest through this column.

DAILY CRYPTOQUOTE—Here's how to work it:
A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
N T Y A G I B L H A G C S N U A J M C S B T D G
S A D A C G E W G N I T K G S O J T C V M C
Y T K J G H
