YOUNG GIRL'S LIBERTY.

Years are a Woman's Protection, and Youth is a Time of Danger.

The liberty and freedom of action allowed young girls of today is the subject of a forcible editorial by Edward W. Bok in the August Ladies' Home Journal. That everything in life is tending to make people freer in thought and action is undoubtedly true, and it is a healthful tendency in the main—healthful for people of years and self-control," writes Mr. Bok. "But no advantage is without its disadvantages. The freer our lives become along healthful and safe lines the healthier will our minds become. But before we can safely profit by these advantages we must have lived long enough to know how to use them and to understand what phases of them to disregard. Because women are freer to travel alone than ever before, it does not necessarily follow that it is wise and right that young girls should be permitted to travel alone. Here comes the truth of the proverb that "what's one man's poison is another's meat." The time was when a woman could not, with self-respect, go to a place of entertainment unattended. Now she can. But that does not make it right for a girl to do so. The chaperon is none the less indispensable to girls today than she was thirty years ago. She is really more necessary, for, as things become more and more possible for women, they should become more impossible for girls. This may sound hard and severe, but young girls must remember that a woman's years are her protection, whereas a girl's lack of years is her danger. The very aim and purpose of the present tendency for woman's greater freedom will be defeated if we allow it to guide the actions of our girls. The danger to immaturity always becomes greater as the danger to maturity grows less. This we should never overlook. It is a blessed change that things are safely possible to women which were absolutely impossible a few years ago. But progress is dangerous as well as healthful. If parents interpret the present changing conditions by allowing greater freedom to their daughters they will make a very sad mistake."

WHAT TO EAT THOSE HOT DAYS.

Healthful Dishes That Can be Prepared With Little Fire.

"During the hot months," writes Mrs. S. T. Rorer in the August Ladies' Home Journal, "the diet should consist largely of dainty, cold, lean meat, green, succulent vegetables, and fruits. It is a popular fallacy that the free use of sub-acid fruits during hot weather causes disturbances of the bowels. No diet is more healthful than ripe fruit provided it is properly masticated and swallowed before or after bread and butter, but never with it.

"The lighter wheat preparations, such as farina, wheatlet and glutene, should be substituted for the heat-giving oatmeal for breakfast. Cook enough one morning to last two, as they are just as palatable cold as they are hot. While fried food may seem a little out of place in the warm weather there are certain light dishes that may be utilized for breakfast. Cornmeal or hominy croquettes, or even rice croquettes, may be made the day before and simply fried at serving time. Squash and cucumbers may be dipped and fried. In the chafing-dish one may have chipped beef, creamed or fricasseed barbecued beef, cold mutton warmed in a little tomato sauce, and dishes of eggs, such as omelets, scrambled eggs, creamed eggs or poached eggs.

"Fruit should be served in a flat dish, with, if the weather is particularly hot, a little chopped ice sprinkled over it. Fruit that is very acid should not be served too cold. Powdered sugar and cream should accompany the fruit course. In the place of chops or steaks we may have eggplant, boiled or fried tomatoes, pan-fried tomatoes, a dainty omelet with peas, omelet with asparagus tips, or with parsley, following the fruit. Corn oysters and corn fritters may also take the place of meat. Coffee, tea, chocolate and milk are of course, in summer, as in winter, the breakfast beverages."

CURE FOR DRUNKENNESS.—Dr. Fred W. Evelyn, head of St. Luc's hospital in San Francisco, has just made public the result of fifteen years experiments, by which he claims to have found a certain cure by inoculation of horse blood for drunkenness, as well as for the hereditary taint of alcoholism. Dr. Evelyn began his investigations while a surgeon in the British army in Zululand and he selected a horse as a clean animal with plenty of blood. His cure is on the same lines as the vaccination remedy, and he asserts that it not only kills the craving for drink, but also relieves the children of a drunkard from the hereditary taint.

ABOUT A GOSPEL TENT.—The Halifax civic authorities and the military are at swords points regarding a gospel tent pitched on the common, where preaching is carried on. Gen. Montgomery Moore says the tent must go, in accordance with the law that no structure can be erected there. Mayor Stephen, who granted permission to put it there, holds that the common is for the joint use of the military and citizens and that the tent is not a permanent structure and that its removal cannot be ordered by the military. It is now a question between them, and the people are awaiting with interest the outcome of the controversy. Despite the general's mandate the tent is still there.

EPISCOPAL MISSIONARY CONFERENCE.—Rev. E. P. Crawford writes to the Halifax Herald:

"It having been announced in the Church Observer for August, that the missionary conference, to be held in Charlottetown, P. E. I., would be postponed, by the bishop's request, until the 22nd and 23rd of September, instead of the 15th and 16th, I have been requested to say that it is found impossible to comply with the bishop's request, as the provincial exhibition will be held in Charlottetown on the 22nd and 23rd, and some of those who have promised to take part in the conference, notably Provost Welch, could not attend on the latter dates. Will you be kind enough, therefore, to make known through your columns, that there will be no postponement, but that the conference will be held, as at first announced, on the 15th and 16th of September.
